

WEBSITE DEVELOPMENT PROPOSAL

Rasmein

Custom Gifting & E-Commerce Platform

Thoughtfully engineered for gifting that feels personal.

Inside This Proposal

- 01** Executive Summary
- 02** Project Objectives
- 03** Scope of Work
- 04** Technology Stack
- 05** Project Phases & Timeline
- 06** Deliverables
- 07** Investment
- 08** Maintenance & Support

1. Executive Summary

Rasmein will be a premium online gifting destination that brings two shopping experiences together on one platform. The first is a guided, build-your-own gift-box experience that lets customers curate personalised hampers step by step. The second is a full-featured e-commerce store for ready-to-buy products, complete with collections, product pages, cart, and secure checkout.

A defining capability of the platform is a flexible dual-mode system. Rasmein can run the entire website as a standard “Buy Now” store with online payments, or switch it to an “Enquire Now” model that captures customer requirements as leads — ideal for bespoke and made-to-order gifts. This switch is controlled centrally from the admin panel.

The platform will be built on **CodeIgniter 4**, a modern, secure and fast PHP framework, and will include a complete administrative backend that gives Rasmein full, independent control over its catalogue, orders, enquiries, content and settings.

At a glance

A premium, mobile-responsive gifting platform combining a custom gift-box builder, a standard online store, a switchable Buy / Enquire journey, and a complete admin panel — engineered on a modern, secure technology stack.

2. Project Objectives

The platform is designed to achieve the following goals for Rasmein:

- Establish a premium, mobile-responsive online presence that reflects the Rasmein brand.
- Let customers create personalised gift boxes through a simple, guided flow.
- Support both direct online purchase and enquiry-based selling from a single platform — with each product set to one mode at a time (Buy or Enquire), never both at once.
- Give Rasmein complete backend control over products, orders, enquiries and content.
- Provide a secure, scalable and maintainable foundation that can grow with the business.

3. Scope of Work

The website will be delivered as an integrated platform made up of the following modules.

3.1 Custom Gifting Experience — Build Your Own Gift Box

A guided, step-by-step journey that makes personalised gifting effortless:

- **Step 1 — Choose a Box:** the customer selects a gift box by size, theme or price tier.
- **Step 2 — Add Products:** the customer fills the box with products, while the system enforces box capacity and shows a running total.
- **Step 3 — Personalise:** an optional gift message / greeting card and a special-requirement note (not mandatory) can be added.
- **Step 4 — Review & Proceed:** the customer reviews the curated box and continues to Buy or Enquire.

Box capacity rules, allowed products and pricing logic are fully configurable from the admin panel, and customers can edit box contents from the cart.

3.2 Standard E-Commerce Store

- Engaging homepage with banners, featured products and curated collections.
- Category and collection pages with filtering and sorting.
- Detailed product pages with image gallery, description, pricing and related products.
- Product search, wishlist and shopping cart.
- Secure checkout with Buy Now and Add-to-Cart options.
- Guest checkout as well as registered customer accounts.

3.3 Dual Journey — Buy Now & Enquire Now

A signature feature that lets Rasmein control how the entire store sells:

- **Master switch:** a single control in the admin panel toggles the site journey between Buy Now (online payment) and Enquire Now (lead capture).

- **Enquiry mode behaviour:** the cart becomes an enquiry list, checkout becomes an enquiry form, and every submission is captured as a lead in the admin with instant notifications to the Rasmein team.

3.4 Additional Store Features

- Payment gateway integration (e.g. Razorpay).
- Coupons and discount codes.
- Order tracking with email / SMS .
- Manual dispatch management.
- Basic SEO setup — meta titles and descriptions for key pages, plus search-engine-friendly URLs. Advanced SEO (keyword research, content and technical optimisation) can be added separately, priced as per requirement.

3.5 Admin Panel — Complete Backend Control

A comprehensive backend that lets Rasmein manage the entire platform independently:

- Dashboard with sales, orders and enquiry insights.
- Product and category management with inventory tracking.
- Gift-box builder configuration — boxes, capacity rules, allowed products and pricing.
- Order management — statuses, invoices and dispatch.
- Enquiry / lead management with status tracking.
- Buy / Enquire mode control.
- Customer management.
- Coupons and discounts.
- Reports and data exports.

4. Technology Stack

The platform will be built on a modern, proven technology stack chosen for performance, security and long-term maintainability.

Component	Technology
Backend Framework	CodeIgniter 4 (PHP)
Database	MySQL
Frontend	HTML5, CSS3, JavaScript, responsive UI framework
Payments	Razorpay (or preferred gateway)
Notifications	Email + SMS
Hosting	Linux-based hosting (client's preferred provider)

Why CodeIgniter 4

CodeIgniter 4 is a modern, actively maintained PHP framework known for its speed, security and lightweight footprint. For Rasmein this means fast page loads, a stable and secure foundation, and a clean codebase that is straightforward to maintain and extend as new features and collections are added over time.

5. Project Phases & Timeline

The project will be delivered in clear phases. Some phases run partly in parallel, so the overall timeline is shorter than the sum of individual estimates.

Phase	Key Activities	Estimate
Phase 1	Discovery & UI/UX design — requirement finalisation, wireframes and visual design	~2 weeks
Phase 2	Core e-commerce build — homepage, catalogue, product pages, cart, checkout, payments	~3–4 weeks
Phase 3	Custom gift builder — gift-box flow, Buy/Enquire switch	~2–3 weeks
Phase 4	Admin panel — full backend across all modules	~2–3 weeks
Phase 5	Testing & QA — cross-device testing, performance and security checks, fixes	~1 week
Phase 6	Launch & handover — deployment, training and documentation	~2–3 days

Indicative overall timeline: approximately 8–10 weeks from project kick-off, subject to timely feedback and content from Rasmein.

6. Deliverables

On completion, Rasmein will receive:

- A fully functional, mobile-responsive website combining custom gifting and standard e-commerce.
- A complete admin panel for managing the entire platform.
- Integrated payment gateway, invoicing and notifications.
- Complete project source code.
- Basic on-page SEO setup — meta titles and description.
- An admin training session and handover documentation.
- A post-launch support period (see Section 8).

7. Investment

The proposed investment for the design and development of the Rasmein platform is outlined below.

Component	Investment (INR)
Website Design (UI/UX design & templates)	₹ 10,000
Website Development (store, gift builder, admin panel & integrations)	₹ 90,000
Total (one-time)	₹ 1,00,000

Payment Schedule

Milestone	Payment
On project commencement (advance)	40% · ₹ 40,000
On core build & design approval	30% · ₹ 30,000
On completion, before go-live	30% · ₹ 30,000

Bank Account Details

Payments may be remitted to the account below:

Account Holder	DEEPAK KUMAR
Account Number	50100524128748
IFSC	HDFC0000267
Branch	BOKARO – JHARKHAND
MMID	9240693
Account Type	Savings Account

Recurring & Third-Party Costs

The following are billed separately or paid directly by Rasmein, as applicable:

- Domain and hosting (annual).
- Payment gateway transaction charges (as per the gateway's standard rates).
- SMS / WhatsApp message credits.
- Annual maintenance and support (optional — see Section 8).

8. Maintenance & Support

A complimentary support period of **20 days** is included after launch to resolve any bugs or issues arising from the delivered scope.

Beyond this period, an optional Annual Maintenance Contract (AMC) is available covering software updates, regular backups, security patches, and minor enhancements — keeping the platform secure, current and running smoothly.

Larger future phases — such as advanced SEO, multi-recipient shipping, loyalty programmes or marketing automation — can be scoped and quoted separately as Rasmein grows.
